Ritesh Thakur

riteshthakur.com| +91-8219091039| thakurritesh8219@gmail.com

Performance-driven AI Engineer specializing in LLM Evaluation (LLM-as-a-Judge), PEFT-based fine-tuning (QLoRA), and Production-Grade RAG pipelines. Expert in building scalable AI backends with FastAPI/Node.js and architecting multi-agent reasoning systems using LangGraph. . Focused on delivering high-accuracy, deterministic AI solutions for enterprise-scale applications.

EDUCATION

B.E. COMPUTER SCIENCE
HP Technical University
June2026 | Shimla,HP
CGPA:7.58

12th
DAV PUBLIC SCHOOL
May2022 | Cum.Per:85%

10th
DAVM PUBLIC SCHOOL
May 2020| Cum. Per: 91.2%

COURSEWORK

Machine Learning
Software Engineering
Cloud Computing
Computer Networks
Web Technology
Operating Systems
Database Management
Artificial Intelligence
Object Oriented Software Engineering
Linux Administration
Data Structures & Algorithms
Modeling & Simulation

SKILLS

PROGRAMMING

AI & Machine Learning:
• Core AI:
RAG Pipelines, PEFT/QLoRA Fine-tuning, Prompt Engineering
• Evaluation:
LLM-as-a-Judge, Automated RAG Benchmarking, Grounding Analysis, Performance Metrics.
• Frameworks:
LangChain, LangGraph , TensorFlow, Hugging Face Transformers.
Languages:
Javascript, Python, C, C++, Java, PHP
Backend:
Node.js, FastAPI, RESTful API Design
Databases:
MongoDB (NoSQL), ChromaDB (Vector Store), Firebase
Tools:
Git, Linux, Docker, AWS, Windows
Libraries:
React.js, Next.js, Streamlit
Web Basics:
CSS3, HTML5, Responsive UI Design

EXPERIENCE

IIT Mandi | Research & Development Intern
January 2026 | Mandi,HP

- Architected a production-grade RAG evaluation framework using LangGraph, ChromaDB, and Streamlit to benchmark retrieval/generation performance and conduct scalability stress testing by measuring accuracy impact across document sets scaling from 50 to 150+ files.
- Executed a comparative performance study between PEFT-based fine-tuning (QLoRA) and RAG methodologies on controlled datasets, utilizing LLM-as-a-Judge scoring and automated benchmarking to optimize model grounding and mitigate hallucinations.

STATELEVELHACKATHON | Winner
March 2025 | Himachal Pradesh

- Designed and implemented an AI-powered healthcare & telemedicine platform, simulating 30+ users and developing 10+ REST APIs.
- Engineered scalable backend and AI workflows, optimizing API response time by 30% and improving AI-assisted health insight accuracy by 15% through data preprocessing and model tuning.

SABEENA DIGITAL MEDIA SERVICES | Intern
May 2024 – Dec 2024 | Remote

- Managed and maintained 5-8 client websites, handling updates, performance fixes, and UI improvements, resulting in 20% faster load times and improved client satisfaction through timely delivery and issue resolution.
- Built a Canva-like web image editor with upload, crop, resize, and text tools, supporting 50+ test users and reducing reliance on third-party design platforms.

PROJECTS

AI-Powered Resume to Portfolio Maker| Code | Link
Jun 2025 | Next JS, MongoDB, LLM, Vercel

Engineered an intelligent resume parser utilizing NLP techniques to extract high-accuracy structured data from DOCX files, automating the generation of professional portfolios.
Optimized LLM API orchestration and backend logic to reduce content generation latency and improve real-time user experience.

EDA DASHBOARD FOR IPL | Code | Link
Nov 2025 | Python, Pandas, NumPy,Streamlit

Developed an interactive data visualization platform using Python (Pandas, NumPy) and Streamlit to analyze complex cricket datasets including team win percentages and player consistency.
Improved data-driven insight discovery speed by 40% through the implementation of dynamic filtering and venue-wise performance impact analysis.

ACHIEVEMENTS

HACKATHONS & COMPETITIONS

Winner	StateLevelHackathon2025
Fifth	CollegeLevelHackathon2023

CERTIFICATIONS

Coursera	MicrosoftAI&MLEngineering
Udemy	TheCompleteAgenticAIEngineering
